Claire,

Our only comment on the additional information contained in Table 1: Comparison of CIL to historic PIC and Horley Tariff mechanisms, would be that this appears not to include the residual S106 obligations for Sustainable Urban Extensions. Therefore in these cases an additional £10,000 (using the Council's assumptions, higher if developer assumptions were used) could be added to each of the totals in the Column for £200/sqm to show the full obligations for an SUE.

Many thanks.

Tom Dobson.
