Introduction

- 1.1 The Community Infrastructure Levy CIL and section 106 planning obligations (collectively known as ‘developer contributions’) are required from most developments and are used by Councils to fund or to provide infrastructure and other projects that support the areas’ development. These contributions support development and help to maximise the benefits and opportunities. In general, section 106 Planning Obligations and S278 Highways are used to secure benefits from individual planning application schemes, whereas CIL is used to address the cumulative impact of development on the area.
- 1.2 Reigate & Banstead Borough Council approved its CIL charging rates and supporting policies in February 2016, and the Council started charging CIL from 1 April 2016. As **Table 1** below shows, CIL receipts collected over the first years of its operation were limited as most approved developments starting construction in those years had been approved before April 2016 when the Council started charging CIL. The first three CIL years were 1 April 2016 - 31 March 2017; 1 April 2017 - 31 March 2018; 1 April 2018 - 31 March 2019. This Statement concerns the fourth CIL charging year. We are currently three-quarters through the fifth CIL charging year.
- 1.3 This is Reigate & Banstead Borough Council’s first Annual Infrastructure Funding Statement (AIFS). It sets out the CIL and section 106¹ planning obligations collected, allocated and spent over the last financial year (2019/20). Throughout this Statement, this is referred to as the “reported year”, as required by the relevant CIL regulations². The Council is required to publish its first AIFS online before 31 December 2020, and then annually after that date.
- 1.4 The Council anticipates that publishing this annual statement will increase transparency with regards to developer contributions collected and spent and will show how the Council is using them to improve the borough and support its development.

¹ Entered into under the Town and Country Planning Act 1990 (as amended)

² The Community Infrastructure Levy Regulations 2010 (as amended) Part 10A “Reporting and monitoring on CIL and planning obligations” Regulation 121A and Schedule 2 “Matters to be included in the annual infrastructure funding statement”

Table 1: Community Infrastructure Levy (CIL) collected since 1 April 2016

Year (1 April – 31 March)	Amount of CIL funding collected
2016/17	£ 187,561.37
2017/18	£ 965,418.45
2018/19	£ 2,230,662.70
2019/20 (The reported year)	£ 3,466,176.19
Total	£ 6,849,818.71

- 1.5 The following sections of the AIFS are set out as required by the CIL Regulations 2010 (as amended) and follow the same lettering of sections set out in the Regulations.

The Infrastructure List

- 2.1 The Infrastructure List below is a statement of the infrastructure projects or types of infrastructure which the Council intends to fund (wholly or partially) using the strategic CIL funds (excluding the local portion which the Council retains to spend in the relevant areas). This is as required by regulation 121A (1)(a) of the CIL Regulations 2010 (as amended).
- 2.2 The CIL Regulations no longer prevent the Council using section 106 planning obligations for the infrastructure on this infrastructure list.
- 2.3 On publication of this Infrastructure List (which will be reviewed through future AIFs), the Council's Regulation 123 Infrastructure List (April 2016), which was published alongside the CIL Charging Schedule in April 2016, will no longer be relevant and will be removed from the Council's website.
- 2.4 The Infrastructure List does not restrict the spending of the "Local" CIL funding portion that is spent by the planning authority (under regulation 59F) or any "local" CIL funding that is returned after five years if unspent or spent not in accordance with the regulations by a "local council", i.e. parish and town councils (under regulation 59E). Nor does inclusion in the list guarantee that the infrastructure will receive any CIL funding.

- i) Within the Borough there are two “local council” areas (with parish or town councils), these are Horley Town Council and Salfords and Sidlow Parish Council. Twice a year the Borough Council passes 15% of the CIL generated from developments within these areas (their “local” CIL portion) for them to spend on their priorities. Town and Parish Councils are required to publish details of their own spending on their websites.

The amount of CIL that was passed to Horley Town Council (HTC) during the reported year was £17,535.61 (of which £10,945.42 was passed to it on 30 April 2019, and £6,590.19 passed to it on 23 August 2019).

No CIL funds were passed to Salfords and Sidlow Parish Council in the reporting year, as no CIL was generated from developments within that Parish in the reporting year.

j) Local CIL Portion Receipts and Spending

In areas of the Borough that do not have a local town or parish council to pass the 15% of CIL receipts generated to, the Borough Council retains the “local” CIL receipts. In Reigate & Banstead Borough, the Borough Council therefore retains

all local CIL funds outside of Horley Town Council area and Salfords and Sidlow Parish. The Borough Council spends this funding (or transfers it to others to spend) on priority infrastructure projects determined by local ward councillors in four “Local CIL Area Panels”, informed by their local communities’ expressed priorities, including through the Community Priority Surveys.

Each infrastructure project allocated funding is referenced by the relevant CIL Local Fund Area Advisory Panels, so “NW” for North West Area Panel, “NE” for North East Area Panel, “CW” for Central West Area Panel, and “CE” for Central East Area Panel. Further detail on the operation of these CIL Local Fund Area Advisory Panels is provided in section 5 of this Statement. A map of the Panel Spending Areas is available via a weblink at paragraph 5.1.

Regulation 59E relates to CIL received by a parish or town council that have not been spent within 5 years of receipt or have been spent but not in accordance with the regulations.

Regulation 59F relates to 15% of the CIL (i.e. the local CIL) received by the Borough Council which derives from developments in areas of the borough which do not have a parish or town council.

- (i) Over the reported year, the CIL receipts collected and retained by Reigate & Banstead Borough Council to spend in the areas of the Borough that do not have a parish or town council to pass the funding to, i.e. the “local CIL portion” (under regulation 59F), was £211,485.81.

During the reported year, the Borough Council received no CIL funds back unspent after 5 years from parish or town councils (under regulation 59E).

- (ii) The infrastructure items which the Borough Council allocated or spent its local CIL funding (under regulations 59E and 59F) in the areas without a parish or town council during the reported year are listed in **Table 4** below:

Table 4: Items of infrastructure which the Borough Council allocated or spent local CIL funding on (and the amount) in the reported year
